

Interested in growing the future?

Trials Officer

An exciting opportunity to work as part of the Germinal Horizon Team in Melksham, Wiltshire, progressing innovative forage crop research.

Your role will involve:

- Drilling preparation, marking out of trials
- Assisting with sampling / harvesting of plots
- Mowing and fertilising of trials
- Assessments and observations of forage crops
- General machinery operation and maintenance
- Data collection, entry, and analysis

Candidates should have a relevant science/ agricultural qualification or trials experience, good communication skills, excellent attention to detail and a UK driving licence.
